

Oxygen Stress Test REDCap Guide

The new parameter *SpO₂ in supine breathing room air for 10 min (if SpO₂ in beach chair breathing room air for 10 min ≥ 92%)* is only recorded during the **Preoperative Visit** at the **Actual Organ Function** form.

Event: **Preoperative Visit**

Data Collection Instruments:

- Investigator
- ARISCAT Score
- Inclusion Criteria
- Exclusion Criteria
- Patient Details
- History of previous disease
- Actual Organ Function**

Applications

- Field Comment Log
- Help & Information
- Help & FAQ
- Video Tutorials
- Suggest a New Feature
- Contact REDCap administrator

Editing existing Patient Serial Number 001001

Event Name: **Preoperative Visit**

Patient Serial Number: 001001

SpO₂ beach chair position + 10 min in room air possible ? yes no

* must provide value

SpO₂: %

* must provide value

FIO₂: % [View equation](#)

* must provide value

Oxygen Stress Test (SpO₂ supine) done? yes no

* must provide value

RR: [/min]

* must provide value

HR: [/min]

* must provide value

ABP mean: [mmHg]

* must provide value

REDCap asks first, whether this so-called Oxygen Stress Test was performed or not (Doing the test is not mandatory!). **This data field needs to be answered for all patients entered newly in REDCap from now on.**

If not done, please tick <no>. If the patient was positioned in supine you need to select whether it was possible to perform the measurement and consequently provide with actual SpO₂. **You select <not possible> only if you tried measuring but failed because of uncomfortableness or desaturation.**

Event: **Preoperative Visit**
