

Newsletter 13

Dresden, July 20, 2017

Dear National Coordinators and Local Principal Investigators of PROBESE,
Dear friends,

There are still 250 patients left to complete our trial. Thus, please keep on including patients, also during summer time.

We welcome the new sites that joined the consortium more recently and ask them to start with great enthusiasm and speed. However, we urge also the “old” sites to enroll further patients – remember that a collaborative co-authorship is granted every 12 successfully completed patients.

Please also do not forget to update the database in REDCap duly in time. We could show excellent indices of online data completeness in the last Steering Committee meeting in Geneva, which took place during Euroanesthesia congress, and this is your achievement. Data completeness is essential to start data cleaning.

Please let us know if we can be of any help in this last phase of PROBESE.

Yours sincerely,

Thomas Bluth, MD
