Subject: IRAS 167739 Probese - non substantial amendment
Attachments: Probese study Consent Form V1.1 Sept15.docx; Probese study Regaining Capacity Consent Form V1.1 sept2015.docx

Dear Gary

The main patient information leaflet was updated as part of the response to the REC's provisional opinion. Unfortunately the relevant consent forms were not updated at the same time to reference the revised patient information leaflet. The relevant consent forms have therefore now been revised to reference the approved PIS. I can confirm on behalf of the sponsor that this represents a non-substantial amendment which does not require notification to REC

Participant consent form [Consent Form] 1.1 25 Sept 2015
Participant consent form [Regaining Capacity Consent Form] 1.1 25 Sept 2015

Best wishes

Erica
